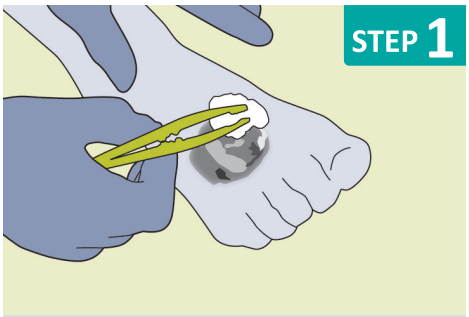
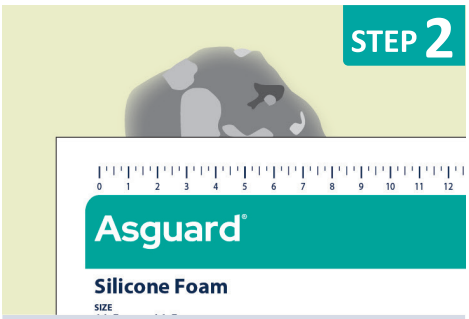
Asguard®

Silicone Foam *(Instructions For Use)*

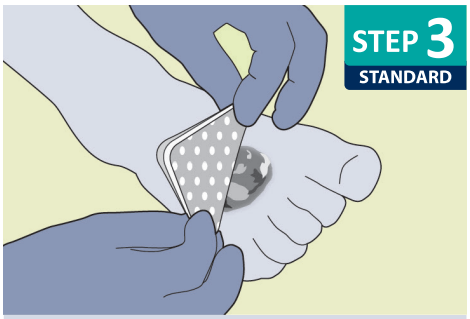
Asguard Silicone Foam dressing without border combines the absorption of foam and the gentle adhesion of silicone. It absorbs exudate through silicone perforations from the wound and provides a moist environment to promote wound healing. The silicone wound contact layer reduces pain and trauma during dressing changes, and enhances patient's comfort. The waterproof outer layer protects the wound from dirt and bacteria.



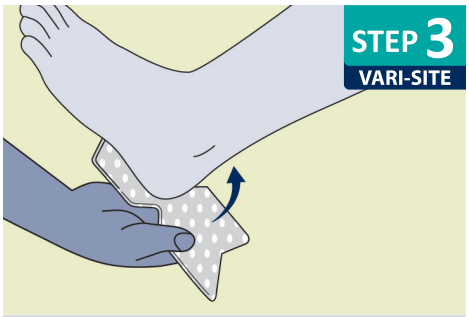
Clean the wound area in accordance with normal procedures. Ensure the peri-wound skin is dry.



Select a dressing large enough to overlap the wound edges by at least 2 - 3 cm. if necessary, cut to shape.



Remove the release film and apply the adherent side to the wound. Smooth the dressing from the center to the edge without leaving any gap, press the dressing edge to ensure good adhesion.



Position the narrowest part of the dressing at the base of the heel. Gently smooth the upper half of the dressing onto the back of the heel and surrounding ankle surface.

To remove the dressing: gently lift the corner of the dressing and slowly peel.

NOTE

The dressing change interval may be several days. Change the dressing before it is fully saturated, at signs of leakage, or as indicated by clinical practice. The dressing may be left in place up to 7 days.

When necessary, fixate the dressing with a bandage or other fixation.

STORAGE & TRANSPORT

The product should be stored in dry conditions.

Keep the product away from direct sunlight and keep dry.

DISPOSAL

Disposal should be handled according to local environment procedures.

At Sentry, we are dedicated to upholding sustainable principles to safeguard our planet, people, and future, and we strive to consistently act responsibly in doing so.

Asguard®

Silicone Foam *(Instructions For Use)*

FUNCTION PRINCIPLE

Asguard Silicone Foam dressing without border is a highly conformable dressing that absorbs exudates, maintains a moist wound environment and minimizes the risk of maceration. The dressing has a silicone wound contact layer, it reduces pain to patients and trauma to wounds and the surrounding skin at dressing removal.

INTENDED PURPOSE & INDICATIONS

INTENDED PURPOSE

Asguard Silicone Foam dressing without border is a highly conformable dressing that absorbs exudates, maintains a moist wound environment to promote wound healing.

INDICATIONS

Asguard Silicone Foam dressing without border is designed for a wide range of exuding wounds such as leg and foot ulcers, pressure ulcers and traumatic wounds, e.g. skin tears and secondary healing wounds.

INTENDED USER

The product shall be used by or under the supervision of a healthcare professional.

INTENDED PATIENT POPULATION

Patient who has the indications: leg and foot ulcers, pressure ulcers and traumatic wounds, e.g. skin tears and secondary healing wounds.

CLINICAL BENEFIT

- For wound management: reduce patient pain at dressing change/removal.
- For wound management: promote wound healing.

CONTRAINDICATIONS

- Check the wound for signs of infection before use, if infection occurs, see a health care professional.
- Do not use on the patients with a known hypersensitivity to the product itself or to its components.
- Do not use on third degree burns.

COMPLICATIONS OR SIDE-EFFECTS

Very occasionally, there will be some potential risks associated with the use of Asguard Silicone Foam dressing with the following:

- Adverse reactions (eczema, erythema, pruritus, blister formation, skin rash, allergy etc.)
- Wound infections
- Risk of maceration (fluid leakage)
- Risk of skin stripping

WARNINGS

- Do not reuse. Reuse will cause cross-contamination.
- Do not use if package is damaged or open.
- Do not use together with oxidizing agents such as hypochlorite solutions or hydrogen peroxide.
- Due to the gentle adhesive used, do not use this dressing to secure other medical devices to the patient.
- If reddening or sensitisation occurs discontinue use and see a healthcare professional.

OTHER INFORMATION

- The foam may change colour to more yellow when exposed to light, air and/or heat. This has no influence on product properties.
- The intended user does not need training for this product.
- If any serious incident occurs in relation to the device, please report it to the manufacturer and the competent authority.

At Sentry, we are dedicated to upholding sustainable principles to safeguard our planet, people, and future, and we strive to consistently act responsibly in doing so.
