

Leak-Proof

Strong and Durable

Various Size Options

The Interster Self Seal Dust Covers are made of a high quality polyethylene and are available in seven sizes. Each dust cover is self sealing, easy to open and has no particle release.

The dust covers can be used to extend the sterile tenability. Furthermore when products are placed in a dust cover, they have an extra protection layer during transportation.

EASY OPENING

Simple tear mechanism below blue adhesive strip

CLEAR POUCH

For easy viewing of contents

LABELLING LOCATION

Large area to write date and contents information

Suitable for:

Storage & protection of sterilised instruments and trays
