

Asguard[®]

SILICONE BORDER LITE

Asguard Silicone Border Lite

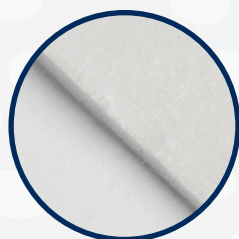

Asguard Silicone Border Lite is a 3 Layer, thin, ultra-flexible foam dressing featuring a gentle silicone adhesive. Designed for a wide variety of low-exuding wounds, it's ideal whenever a low-profile foam dressing is required. Combining effective absorption with enhanced mobility, Asguard Silicone Border Lite supports wound management without compromising comfort or flexibility.

Why Choose Asguard Silicone Border Lite?

	ATRAUMATIC REMOVAL	Designed to reduce discomfort during dressing changes, the soft silicone adhesive minimizes pain and tissue damage.
	SKIN FRIENDLY PERFORMANCE	Ideal for fragile or sensitive skin, offering protection against trauma and making it a smart choice for elderly and paediatric patients.
	EXTENDED SILICONE BORDER	The increased size and width of the silicone border ensures longer wear time and reduces the frequency of dressing changes.
	COMFORT IN MOTION	Flexible and soft-edged silicone allows the dressing to conform to body contours and mobile areas such as knees and elbows, reducing the risk of rolling or detachment.
	PROTECTIVE BARRIER	Provides a barrier against external contaminants and protects the wound during daily activities such as showering.

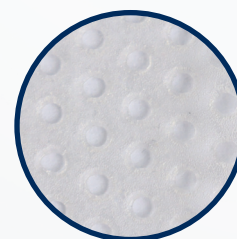

Multi-Layer Design

Secure, Gentle, Effective

Asguard Silicone Border Lite

Compared to traditional adhesives or contact layers, Asguard Silicone high-adhesive technology offers a balance of secure fixation, gentle removal, and clinical versatility. It is especially beneficial for:

- Chronic wounds
- Fragile or sensitive skin
- Pediatric and geriatric patients
- Post-surgical sites

Asguard Silicone Adhesive

High Adhesion featuring a larger Silicone Border for improved securement and extended wear time

Low-Profile Design

Thin, smooth layers reduce bulk and friction, ensuring compatibility under compression or clothing

Absorbent Foam Core

Manages exudate efficiently

Water & Shower Resistant Film

Designed to reduce dressing changes and maintain integrity during routine hygiene and mobility

Available in Multiple Sizes

Square and rectangular formats for different wound types and locations
