

Silicone Border Lite

Asguard Silicone Border Lite is a thin, ultra-flexible foam dressing with a gentle silicone adhesive. Designed for the management of wounds with low exudate including pressure injuries, leg ulcers, and surgical wounds, it offers effective absorption while maintaining a moist wound environment to support optimal healing. Asguard Silicone Border Lite is recommended when a low-profile foam dressing is clinically indicated, its discreet profile and flexibility make it an ideal choice for patients seeking comfort without compromising wound care performance.

Soft Silicone Adhesive

Provides reliable tack through multiple points of contact, keeping the dressing securely in place while preventing leakage and skin maceration

Low Profile Design

Thin, smooth construction sits close to the skin, reduces pressure points, and allows comfortable use under compression or clothing

Absorbent Multi-Layer Design

Locks in exudate and bacteria, reducing the need for frequent dressing changes. Distributes fluid evenly to maintain a balanced wound healing environment

Water & Shower Resistant Film

Designed to reduce dressing changes and maintain integrity during routine hygiene and mobility activities

Suitable for:

- Superficial wounds with light to moderate exudate
- Arterial, diabetic and venous leg ulcers
- Skin tears, pressure injuries, partial thickness burns and surgical wounds

Square - AWS1010

Rectangle - AWS05125
