

## Tourniquet

The Bodichek Tourniquet consists of a strap and clip buckle mechanism to prevent pinching, catching or jamming. Designed to be used multiple times on a single patient, to help prevent cross infections.

### Easy to Use

Quick and slow buckle release mechanism allows for easy application and removal

### Comfortable Band

Soft and adjustable band to suit every patient

### Single Patient Use

Helps prevent risk of patient infection

- Suitable for:**
- Blood sample collection
  - Cannulation procedure
  - First aid use to stop bleeding
