

## Catheter Securement Devices

Sage Catheter Securement Devices utilise a combination of adhesive and securement straps to effectively secure the catheter in place. The adhesive backing provides a secure and durable bond to the skin, while the straps offer additional support and stability.

### Re-adjustable Tabs

Ensures proper positioning and stability of catheters

### Water Resistant

Allowing patients to maintain their regular hygiene routines without compromising the device's effectiveness

### Gentle Adhesion

Easy application and removal, minimising discomfort for patients

**Suitable for:**

- Urinary catheter drainage
- Universal securement for various tubing and drains
