Surgical Gowns

Introducing a new generation of surgical products, carefully designed and developed in partnership with Australian hospitals and specialists to exceed clinical design needs, raise quality and compliance standards and add value for the Australian Healthcare system.

Design and Comfort

SureSafe Surgical gowns are designed for Australian requirements in partnership with Australian clinicians for both patient and practitioner. SureSafe guarantees protection and comfort through a unique combination of material softness, breathability, gown design and cut and features such as sonic welded seams. SureSafe Surgical Gowns are truly designed for a wide-variety of surgical applications within Australian hospitals.

Compliance and Protection

All SureSafe surgical gowns comply with EN 13795-3 and the Association for the Advancement of Medical Instrumentation standards (AAMI). SureSafe products are manufactured under strict quality control processes and comply with ISO 13485. All products are CE marked and guarantee our products meet the essential requirements of the Medical Device Directive.

Environmental Care

SureSafe gowns and draping materials are by-products of the oil industry. No cellulose and wood pulp are present in our products, which ensures no trees are consumed in the manufacturing process. The products do not present a significant risk to the environment when incinerated after use and are broken down to carbon dioxide and water.

SureSafe35 Standard Surgical Gown

SureSafe35® standard surgical gowns are made from 4-layer polypropylene materials and are anti-static and fluid resistant. Two layers of spunbond polypropylene ensure an extraordinary flexibility and drapeability, provide tough abrasion resistance and cloth like feel. The two layers of meltblown polypropylene forming an exceptional microbial barrier against bacteria.

Compliance AAMI Level 2 - EN 13795 – Full Coverage

4-layer anti-static breathable fabric

Fluid repellent

Excellent microbial barrier

Light weight material, less recycled waste

Velcro neck binding

Cost-effective

Generous cut

Large transfer wrap – 90 x 90cm

SureSafe35 Poly-Reinforced Surgical Gown

AAMI
LEVEL 3

SureSafe35® poly-reinforced gowns are made from 4-layer polypropylene materials with anti-static and fluid resistance. Two layers of spunbond polypropylene ensure an extraordinary flexibility and drapeability, provide tough abrasion resistance and cloth like feel. The two layers of meltblown polypropylene forming an exceptional microbial barrier against bacteria. The critical zones including arm and chest areas are protected by poly-reinforcement with an additional strong and breathable membrane. The seams on the sleeves are ultrasonic sealed to avoid fluid penetration through pin holes.

Compliance AAMI Level 3 - EN 13795 – Full Coverage

SureSafe50 Poly-Reinforced Surgical Gown

**AAMI
LEVEL 3**

SureSafe50® provide AAMI level 3 fluid protection with additional critical zone reinforced protection in a comfortable, yet highly functional and protective gown.

SureSafe50® poly-reinforced gowns are made from 5-layer polypropylene materials with anti-static and fluid resistance. Two layers of spunbond polypropylene ensure extraordinary flexibility and drapeability. The gown provides tough abrasion resistance with a cloth like feel, and two layers of meltblown polypropylene forming an exceptional microbial barrier against bacteria.

The critical zones including arm and chest areas are protected by poly-reinforcement with an additional strong and breathable membrane. The seams on the sleeves are ultrasonic sealed to avoid fluid penetration through pin holes.

SureSafe68 Premium Surgical Gown

SureSafe68® Breathable Viral Barrier (BVB) Surgical Gowns offer the highest level of protection with breathable monolithic film covering the entire gown area.

BVB surgical gowns are made from BVB tri-laminate material, combining strength with softness, high breathability and excellent barrier properties against real world viruses causing infectious diseases such as HIV/AIDs (human immunodeficiency virus), SARS (Severe Acute Respiratory Syndrome) and Avian Influenza. The outer layer provides additional fluid repellence and strength, the inner layer provides a soft touch to the wearer’s skin.

The layer between the inner and outer layers is a membrane which has a monolithic, non-porous structure that provides an impervious barrier, thus blocking the passage of viruses and bacteria. The structure of the film allows moisture vapour to pass through, allowing the wearer to remain comfortable whilst providing the highest level of protection. BVB gowns feature sonically-sealed seams (instead of stitched seams) to prevent strike through where the sleeves are joined to the body of the gown.

-
- Tri-laminate - SPP/ polyester copolymer film / SPP
-
- Compliance with ASTM F1671 – Maximum performance test
-
- Compliance AAMI Level 4 - EN 13795 – Full Coverage
-
- Abrasion and puncture resistant
-
- Cool and comfortable
-
- Impervious barrier
-
- Lightweight, soft and strong
-
- Sonically-sealed seams prevent strike through

+ SureSafe[®]

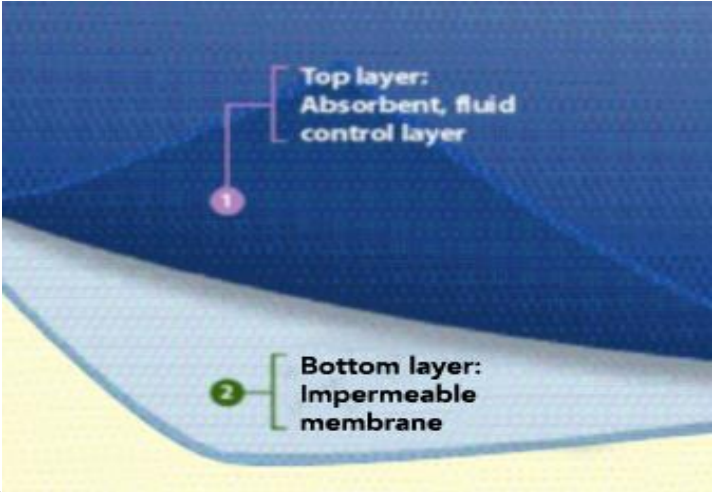

Surgical Drapes

SureSafe®

SureSafe Drapes are made of the highest quality draping material to comply with EN 13795-3 – the industry standard for surgical draping material.

SureSafe Drape Features

SureSafe drapes consist of laminated polypropylene and polyethylene layers to provide absorbency across the entire fabric surface to ensure a fully impervious barrier to prevent fluid strike-through and protect against bacteria penetration. SureSafe drapes are low-linting with a non-skin surface, in addition to being puncture and abrasion resistant and have a variety of strong and safe fluid control features to soak up spills and splatters yet provide excellent flexibility and drapeability.

Compliance and Protection

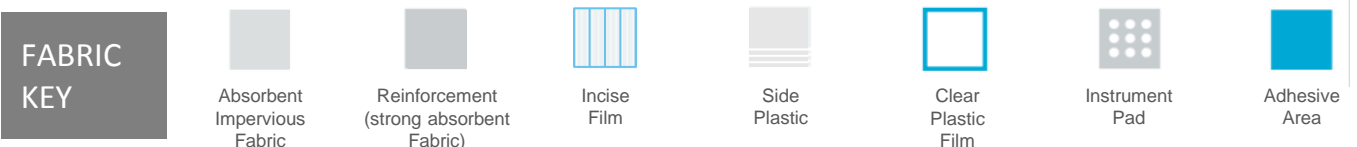

Protection of both patient and practitioner against fluids and infectious diseases is our priority. All SureSafe surgical gowns comply with EN 13795-3 and the Association for the Advancement of Medical Instrumentation standards (AAMI). SureSafe products are manufactured under strict quality control processes and comply with ISO 13485. All products are CE marked and is our guarantee the products meet the essential requirements of the Medical Device Directive.

Environmental Care

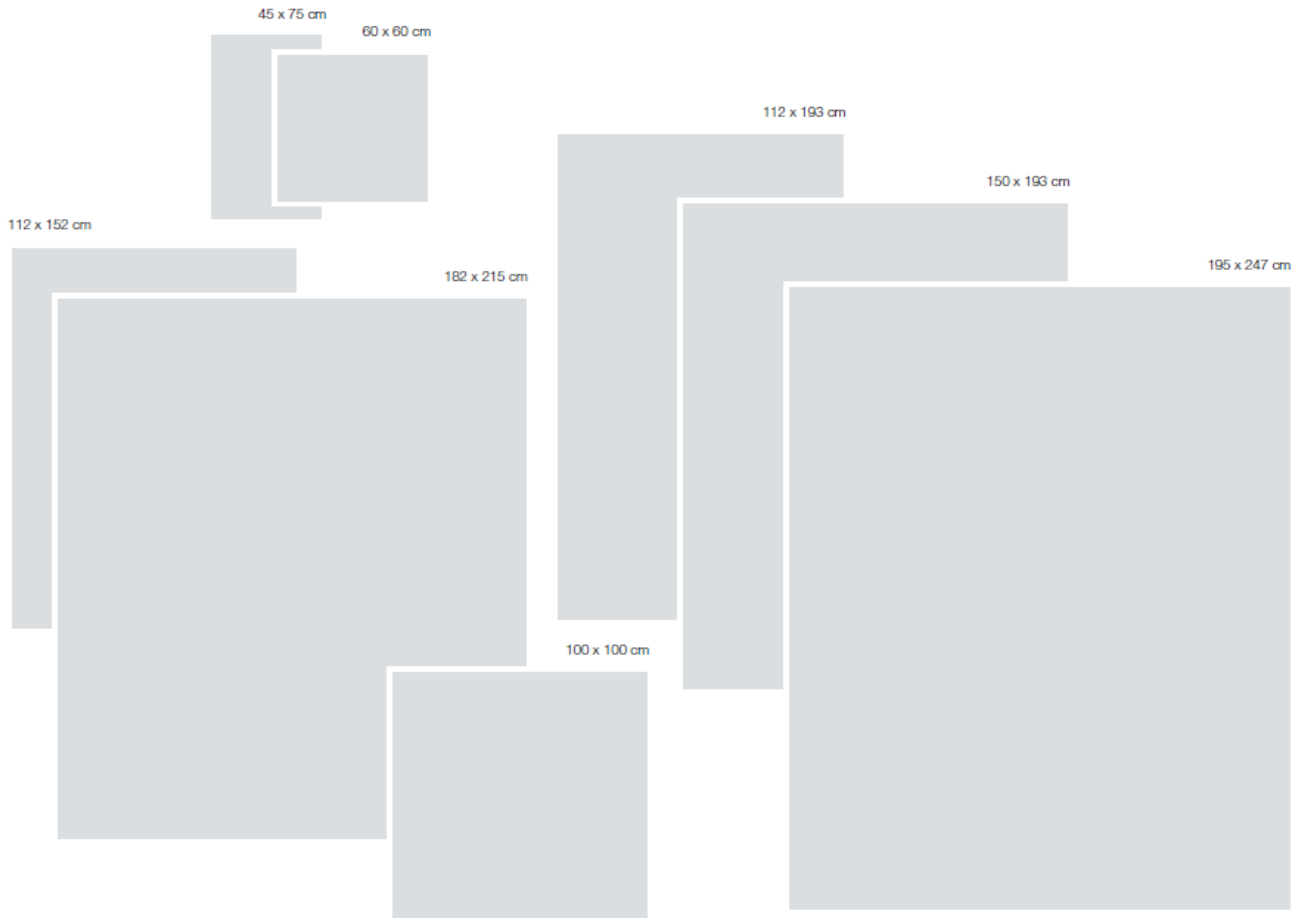

SureSafe gowns and draping materials are by-products of the oil industry. No cellulose and wood pulp are present in our products, which ensures no trees are consumed in the manufacturing process. The products do not present a significant risk to the environment when incinerated after use and are broken down to carbon dioxide and water.

Clinical Accessories

SureSafe CliniCover Absorbent Underlay

CliniCover is specifically designed for use in the operating room to protect the operating table or it can be used in any other medical or hospital environment where a fully absorbent underlay is required.

CliniCover can replace regular linen used in hospital. It has an impervious backing which prevents blood and body fluids from coming into contact with the operating table and being absorbed by the mattress pad. The width of CliniCover allows it to be tucked underneath the mattress.

Whether in a theatre or ward, CliniCover makes the time consuming job of cleaning and disinfecting the hospital bed fast and efficient and will extend the life of mattress and operating table pads.

Features

-
- Lint free
-
- Latex free
-
- Strong absorbent reinforcement
-
- Impervious backing
-
- Disposable
-

Benefits

-
- Reduced risk of contamination
-
- Improved infection control
-
- Easy of use
-
- Reduced cleaning time
-
- Greater patient comfort
-
- Extends the life of mattress and operating table pads
-

SureSafe 5 Sterilisation Wraps

SureSafe5 sterilisation wraps are made from a single polypropylene layer to provide tear, puncture, abrasion resistance and a microbial barrier for sterility maintenance. The wraps are suitable for heavy duty applications yet ensure extraordinary flexibility and drapeability. SureSafe5 sterilisation wraps can withstand autoclaving temperatures up to 136° C.

The physical properties of SureSafe5 sterilisation wraps meet AS 1079.5-2003 and all packaging materials conform to EN 868.

Features

- Standard 43gsm
- MPP – Microbial barrier for sterility maintenance
- SPP - Tear, puncture & abrasion resistant
- Two-tone allows for easy recognition of tears/damage
- Cost effective

Sterilisation Suitability

- ETO
- Steam
- Plasma
