

reclens EXTENDED HYDRATION

Multi-Purpose Disinfection Solution

NEW 6-IN-1 FORMULA

reclens® Extended Hydration Multi-Purpose Disinfection Solution

For over 30 years, Sentry Medical has been helping health care professionals provide exceptional care to their patients through a modern and quality driven portfolio.

Reclens® offers a trusted range of contact lens and eye care solutions including Saline, Eye Wash, and Multi-Purpose formulas for all types of soft lenses. Widely used across Australia, Reclens combines everyday ease with reliable performance to support comfortable, hygienic lens care.

The NEW Reclens Extended Hydration is an all-in-one Multi-Purpose Disinfection Solution (MPDS) suitable for all types of soft contact lenses, including new-generation silicone hydrogel lenses.

NEW 6-in-1 Formula

The Reclens Difference

Extended Hydration

Helps keep lenses moist for longer to address dryness and discomfort, and support comfortable lens wear throughout the day

Cleaning & Disinfection

Maintains lens hygiene with antimicrobial properties that help reduce the build-up of microbes

Protein Build-up Management

Assists in preventing and removing protein deposits that can accumulate with regular lens use

pH Balanced

Formulated to match the natural pH of your eyes for gentle, comfortable wear

Everyday Convenience

Available in multiple sizes suitable for home, travel, or work use

New Formula, Same Trusted Brand

The Reclens Multi-Purpose Solution has been updated with a new and improved formulation, offering longer hydration support for everyday users while retaining the trusted performance of the original product.

NEW FORMULA

POLYVINYLPIRROLIDONE (PVP)
A next-generation ingredient that draws in and holds more moisture to help support extended lens wear

Quickly attracts and binds moisture due to its hygroscopic nature, improving immediate hydration

Holds onto moisture for longer periods, helping to keep lenses hydrated and comfortable throughout the day

ORIGINAL FORMULA

HYDROXYPROPYL METHYLCELLULOSE (HPMC)
A reliable ingredient used widely in eye care to keep lenses moist and comfortable

A slower rate of absorbing water, meaning it takes longer to bind moisture to the lens surface

Helps retain lens moisture for comfortable wear during the day

KEY HYDRATION AGENT

MOISTURE ABSORPTION

MOISTURE RETENTION

Proven Antimicrobial Capacity & Disinfecting Performance

Formulated with polyhexanide, a broad-spectrum antimicrobial agent effective against a wide range of microorganisms, to ensure thorough disinfection of the lens surface.

Combined with EDTA, which helps loosen deposits and build-up, it ensures a deeper clean. This solution supports daily hygiene, keeping lenses clean, fresh, and comfortable for all-day wear.
